

Full Moon Lecture Outline

Note: This outline is for a lecture that can be a little over one hour in length lecture – and, depending on your group and questions, it could run longer. In most cases you will not want an hour lecture, in fact an hour will be too long. We therefore suggest that you delete the parts that you do not need. For example you could delete:

- the discussion of the [Astrology Sign] myth.
- the Labour of Hercules.
- the Current Full Moon Chart.
- other content not appropriate for your group.

Our idea is that if you have too much information you can easily remove some, but it's harder to add to a lecture. Of course we encourage you to make this your lecture and this is simply a place to start.

- Introduction
- Why are we here?
- All is Energy?
- Sign Presentation Outline
